

The largest **Intelligent Safe & Smart City** project in the Middle-East features a holistic **Command & Control (C2)** platform that collects information from disparate sources (e.g., varied sensor types; databases; open source platforms; citizen trustees ) to generate a comprehensive unified situational awareness picture (USAP) for all who need it, including first responders, operators and key decision-makers

#### 4D Security deliverables:

- Customer requirements analysis, covering major city agencies
- Solution detailed design, including civil, network and outdoor
- Design and development of test and integration labs
- Command & Control Software customization
- Program management support
- Multi-year Sustainment and In Field-Personnel Management

#### Unique Value Offering:

- Effective reduction of security and safety events with thousands of solved cases per year
- Urban management platform enabling efficient collaboration between government agencies
- Cost effective design and implementation – by smart use of existing infrastructure and platforms
- Provide customers with innovative, integrative approach to managing urban operations and processes

Our **Real Time Crime Center** project in the United States features a holistic **Wisdom™ Command & Control (C2)** platform that collects information from disparate sources (e.g., varied sensor types; video management systems; CAD; and databases) to generate a comprehensive unified situational awareness picture (USAP) for all who need it, including first responders, operators and key decision-makers

## 4D Security deliverables:

- Command and Control system
- Project Management
- Site Surveys
- System Integration and deployment
- Operator Training
