

# wisdom **LE**

c2 for law enforcement

*Security. Safety. Operations. These are your daily concerns. The Wisdom LE command and control platform from 4D Security Solutions lets you manage any and all of these domains from a single interface. Wisdom LE is specifically designed for law enforcement applications.*

*Key features include specialized video management and incident management capabilities that optimize law enforcement response capabilities and minimize response times. Video management is specifically designed to store high resolution video from dozens to hundreds of cameras on a single appliance, or thousands of cameras in a networked configuration. Incident management displays events on a unified situational awareness map to enhance security operators' understanding of, and ability to react to incidents.*

*Wisdom LE integrates into systems with a wide range of security infrastructure partners and system architectures, making it easy to deploy and operate.*

# Helping you make the right decisions that save lives.

Wisdom LE is about optimizing resources and ensuring that its customers have the right people, in the right place, at the right time, with the right information.

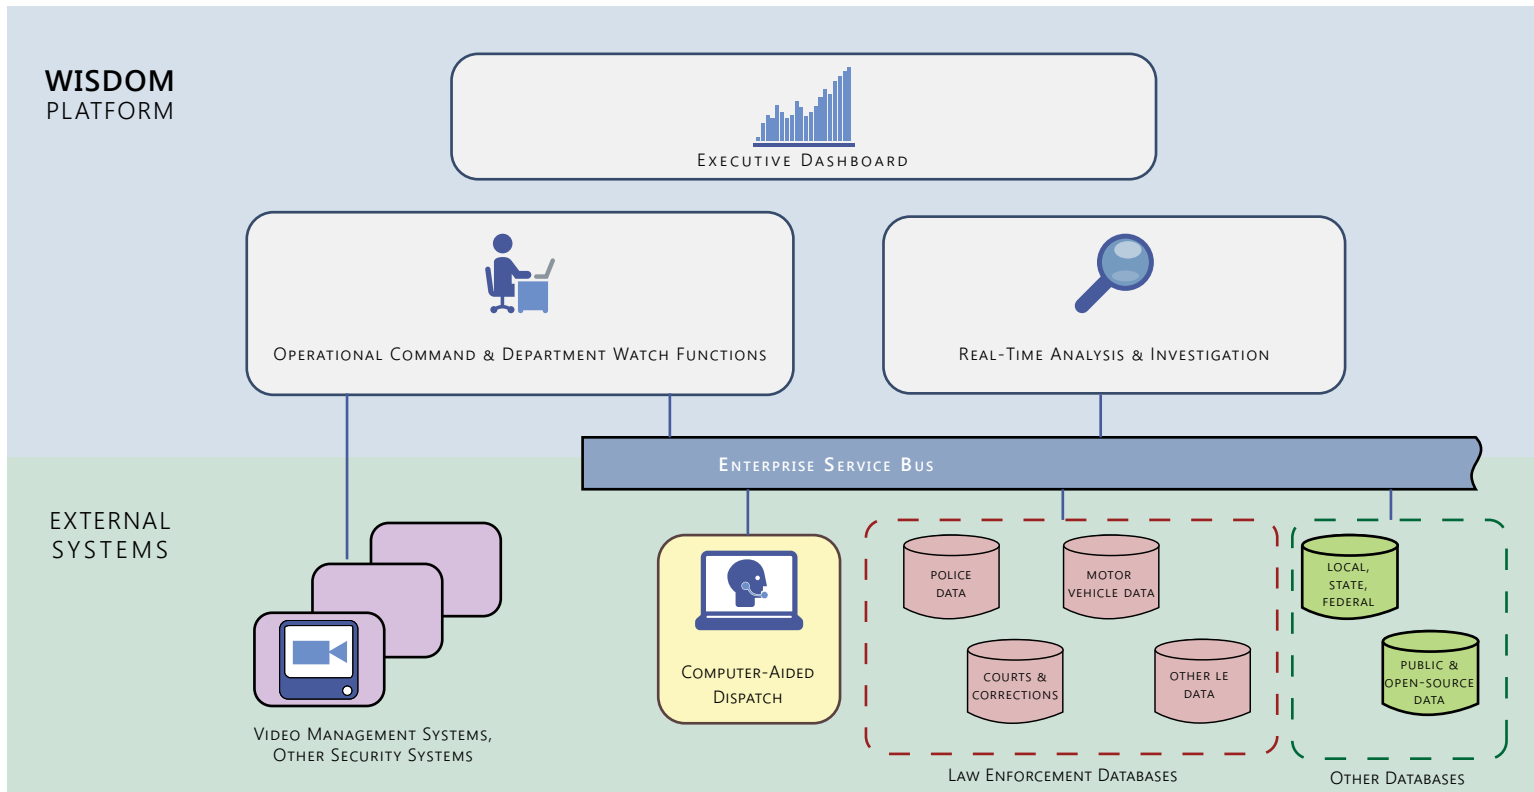

The Wisdom platform interfaces directly with video management and other security systems and connects to databases and computer-aided dispatch systems via industry-standard enterprise service buses. This “plug and play” ability of Wisdom allows it to remain responsive and agile to the evolving requirements of the law enforcement community.

Wisdom analyzes all inputs from these disparate systems to provide a comprehensive visualization of relevant events giving operators the ability to focus their attention on important situations and respond appropriately.

Wisdom LE includes an event deconfliction function, alerting officers about cross-operations in the area when executing search warrants, conducting raids, undercover operations, surveillance, or performing other activities.

Wisdom LE also provides an analysis portal providing broad investigative tools, as well as management and reporting functions that serve the needs of law enforcement agencies.

Ultimately, Wisdom is about peace of mind—the peace of mind that comes from knowing your critical assets are protected by the best available LE security product on the market—a product built by the acknowledged leader in the field, 4D Security Solutions.

Wisdom LE is effective in a broad range of applications, including:

- Real-Time Crime Centers
- Regional and Local Incident Management Centers
- Law Enforcement Computer Aided Dispatch Facilities

## Designed for Law Enforcement Agencies

- Integration with municipal emergency call centers (911)
  - Calls for service are displayed on the map
  - GIS display of real-time event feed using proprietary or ESRI standard symbology
  - Display of detailed event and related information
  - Aids response coordination
- Video monitoring and event assessment
- Field Operations Guide
  - Provides standard event response procedures
  - Standard response templates for critical events
  - Customizable for specific situations and events
- Visualization of resource availability
  - Coordination of event responses
  - GIS display of available resources
- Event Deconfliction

*Wisdom LE three-monitor workstation*

*PTZ Day/Night Cameras*

*Motion Detection Systems*

*Smart Fence Systems*

*Radar Systems*

*License Plate Readers*

*Access Control Systems*

4D Security Solutions, Inc., based in South Plainfield, New Jersey, has implemented state-of-the-art innovative secure systems since its inception in 2004. 4D is a security solutions provider offering systems assessment, design, installation, and systems integration services to major customers with large critical facilities, in operations such as airports, petrochemical plants, borders, rail, maritime ports, and urban area traffic monitoring/control. 4D's technology and services are proven in demanding environments world-wide including some of the world's largest metropolitan critical asset and transportation projects.

*Wisdom software is protecting people, commerce, and infrastructure around the world:*

- *2 million people in Abu Dhabi*
- *500 miles of international border*
- *Philadelphia, PA Real-Time Crime Center*
- *15% of the world's liquefied natural gas (LNG) supply*
